

Accessing TESS Data at MAST

User Interfaces and Webpages (with a particular
emphasis on Full Frame Images (FFIs))

Travis Berger on behalf of MAST

MAST: A Primer

- MAST, or the Barbara A. Mikulski Archive for Space Telescopes, serves as the archive for TESS Mission data and related High Level Science Products (HLSPs). MAST also serves as the archive for Hubble Space Telescope, James Webb Space Telescope, and other Missions!
- You can access MAST data at the following link:
 - <https://archive.stsci.edu>

Barbara A.
**MIKULSKI ARCHIVE FOR
SPACE TELESCOPES**

Maximizing the scientific accessibility & productivity of astronomical data.

The Mikulski Archive for Space Telescopes is an astronomical data archive focused on the optical, ultraviolet, and near-infrared. MAST hosts data from over a dozen missions like Webb, Hubble, TESS, Kepler, and in the future Roman.

Map of Observations

Wavelength Coverage

The Transiting Exoplanet Survey Satellite (TESS) is an all-sky transit survey, whose principal goal is to detect Earth-sized planets orbiting bright stars that are amenable to follow-up observations to determine planet masses and atmospheric compositions. TESS will conduct high-precision photometry of more than 200,000 stars during a two-year mission with a cadence of approximately 2 minutes. These targets will be read-out as postage stamps and be made available to the community as target pixel files (TPFs) and calibrated light curves. In addition, the full image frame will be read out approximately every 30 minutes. These Full Frame Images (FFIs) will enable users to conduct photometry on any target within the 24x96 degree field-of-view.

Active From

April 2018 - Present

Resolution

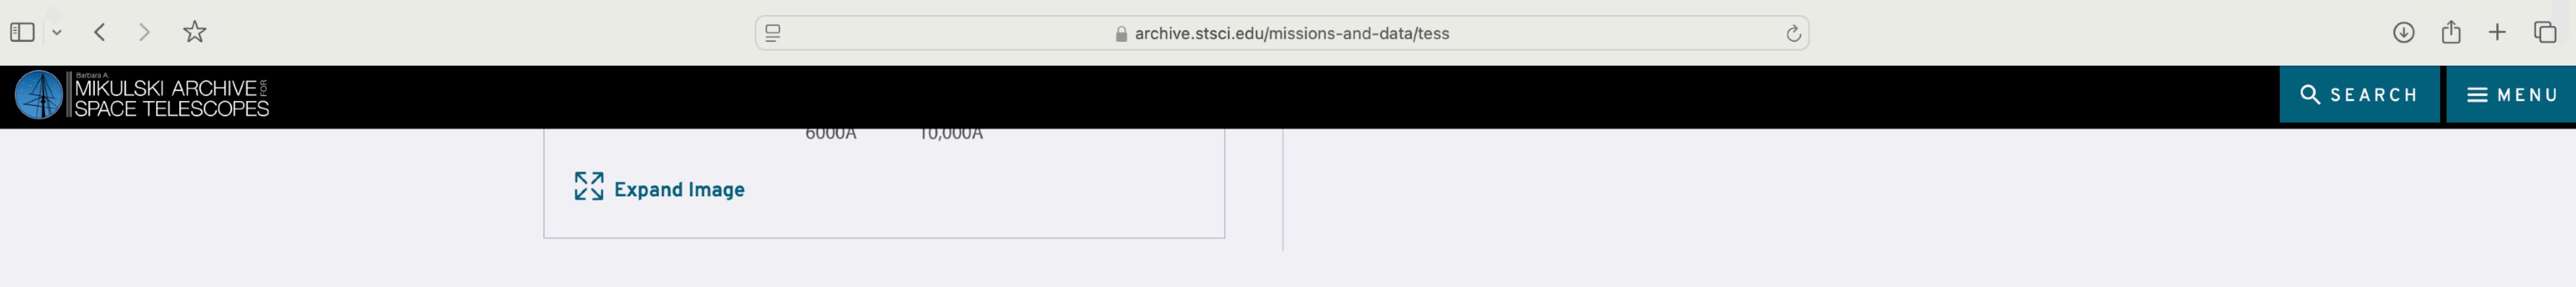

21 arcseconds / pixel

Capabilities

- Time Series

- Imaging

Data Availability

Consult the [Data Holdings Table](#) to know which Sectors are available in MAST services and interfaces.

Documentation

TESS Archive Manual

Created by Scott Fleming, last modified by Susan Mullally on Apr 16, 2018

The purpose of this manual is to describe the MAST holdings of the TESS data products and how to obtain those products. We show the relationship between different types of TESS files, including community provided high-level science products. We provide a number of tutorials that show you how to search and download TESS data using MAST services. We also give detailed instructions on how to label a data set with a Data Object Identifier (DOI).

- 1.0 - Introduction to TESS
- 2.0 - Data Product Overview
- 3.0 - Citing Data Products (Using DOIs)
- 4.0 - Contributing High Level Science Products To MAST
- 5.0 - Ways To Search And Interact With TESS Data At MAST
- 6.0 - Data Search Tutorials
- 7.0 - Tips and Tricks to Getting TESS Data At MAST

December 6, 2018

Search Tools

All Search Options TESS Search Tutorials

Links we will focus on in this demo

1

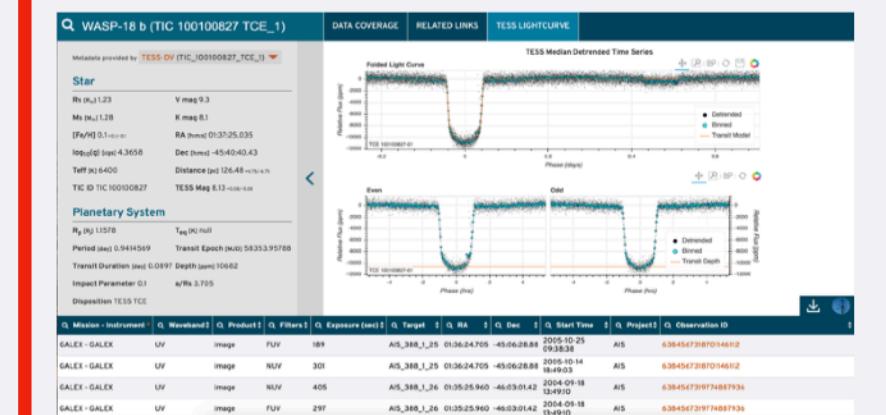

MAST Portal

Download light curves, target pixel files, and data validation files for a few targets. Download full frame images for a few CCDs. Conduct small searches within the TIC or CTL. Find data from other missions for your target.

Search Tools

All Search Options TESS Search Tutorials

```
In [1]: obsCount = Observations.query_criteria(obs_collection = "TESS",
                                             mission_type = ["timeseries"],
                                             sequence_number = 1,
                                             proposal_id = "G011183")

print("Number of Observations: %i" % obsCount)

In [2]: obsTable = Observations.query_criteria(obs_collection = "TESS",
                                             mission_type = ["timeseries"],
                                             sequence_number = 1,
                                             proposal_id = "G011183")

obsTable[0:5][['objid','proposal_id','obs_id']]

Retrieving the list of Data Products
```

Next we use astroquery to retrieve the list of data products that are associated with each observation. We will only ask for the data products associated with the first five. The [0:6] can be removed from the code below to get all the observations.

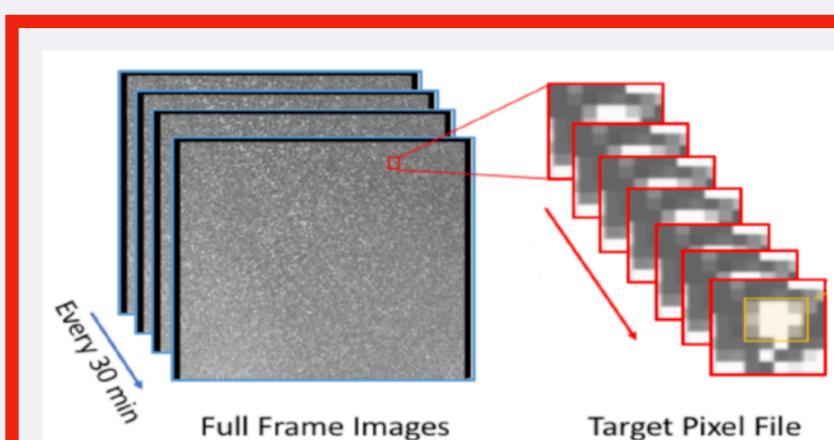

```
In [3]: dataProducts = Observations.get_product_list(obsTable[0:6])
dataProducts.colnames
```

```
In [4]: dataProducts[['obsID', 'productFilename', 'description']]
```

MAST Astroquery

Search for, and retrieve, TESS data products programmatically based on a list of coordinates or target names. Interact with observational data, TIC, and CTL catalogs in programs you write.

3

TESScut

Create time series pixel cutouts from the TESS full frame images. Find out what sectors/cameras/detectors a target was observed in.

2

Simulated TESS Data Products

Visit the [simulated data product homepage](#) for download instructions and directory information.

TIC and CTL Bulk Downloads

Visit the [TIC and CTL download page](#) to get the full catalogs as .csv files.

Bulk Download Of FFI, Target Pixel, Light Curve, and DV Files By Sector

Visit the [FFI/LC-DV Bulk Downloads Page](#) to get cURL scripts to download all the full frame images, target pixel, light curve, or data validation files for a given sector.

Target Pixel, Light Curve, and Data Validation Files By Guest Investigator Program

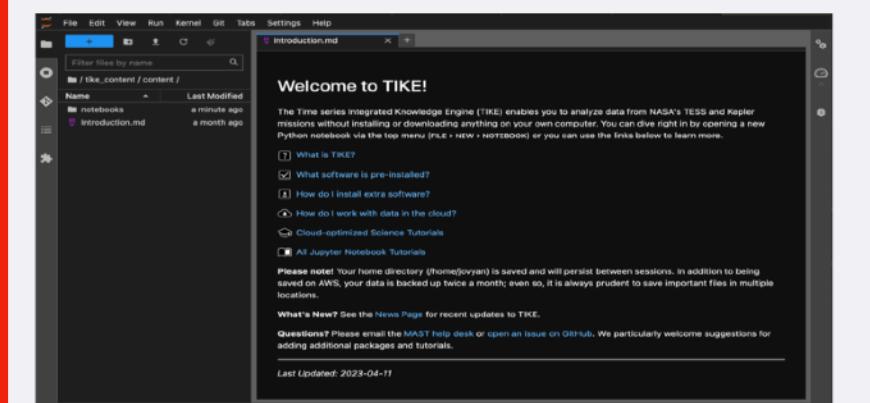

Visit the [Guest Investigator Bulk Downloads Page](#) to get cURL scripts to download all light curves or target pixel files for a given Guest Investigator Proposal ID.

Download TCE Catalogs In CSV Format

Visit the [TCE Bulk Downloads Page](#) to get .csv text files of all the Threshold Crossing Event (TCE) statistics from a given sector or sector range ("multi-sector").

Bulk Downloads

Download all light curves or target pixel files for a given sector or GI program. Download all full frame images for a given sector. Download the entire TCE table for a given sector. Download versions of the TIC and CTL.

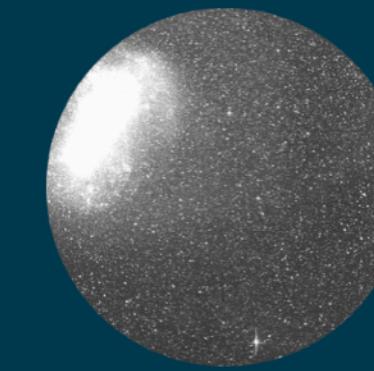

Cloud Access

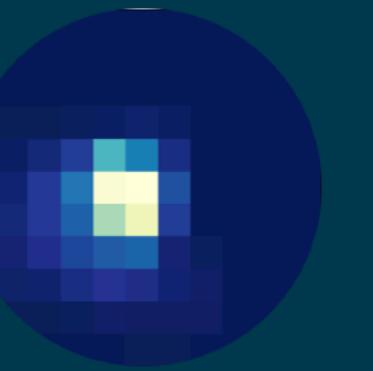

Access TESS data in TIKE, our free cloud computing environment that runs in your browser using JupyterLab. There's no need to download and analyze terabytes of data on your computer; instead, get started right away with quick data access and pre-installed software. Calibrated and uncalibrated full-frame images, two-minute cadence target pixel and light curve files, co-trending basis vectors, and FFI cubes are all available.

Service Outage Tuesday On Tuesday, January 7, starting at about 8am US Eastern, proprietary retrievals and batch distribution of HST, JWST, and TESS data may be unavailable for about two hours for routine systems patching.

JWST and HST Program Status Pages Down A server that provides JWST and HST program status pages is temporarily unavailable, so links from MAST results to GO programs will not work.

MAST: Barbara A. Mikulski Archive for Space Telescopes

The MAST Portal lets you search multiple collections of astronomical datasets all in one place. Use this tool to find astronomical data, publications, and images.

Note: This site uses cookies in order to monitor feature usage, track user preferences, and provide authentication for some services. By using this site you consent to the use of cookies for such purposes.

What's New

JWST Instrument metadata have changed. Now, the complete configuration is specified; for example, an Observation previously labeled "MIRI" might now be labeled "MIRI/IMAGE." This update brings JWST metadata in line with HST and allows for greater specificity in your search. See the [JWST Instrument Names](#) page for a full list of configurations.

Data from [FIMS-SPEAR](#), a joint Korean-US UV satellite, are now available in MAST. In addition to its invaluable spectral maps of the UV sky, FIMS-SPEAR has paved the way for us to ingest new cubesat, balloon, and small-rocket missions. Stay tuned as we add more of these missions to our collection!

You can now [access the PLATO MAST Catalog](#) using the API or catalog search form.

Data Retrieval Notes

- MAST FTP:** Starting October 25 2021, the MAST FTP server archive.stsci.edu will no longer support unencrypted FTP connections. Only encrypted FTPS will be supported. Read more about this change and some related FAQ on the [MAST FTP Service page](#).
- Auth.MAST Authentication:** New authentication mechanism for accessing exclusive access data via cURL or Astroquery. Please visit <https://auth.mast.stsci.edu> for authentication needs or view the [tutorial video](#).
- Access MAST Programmatically:** with [Astroquery](#) or the [general API](#).

Release Notes

[MAST Portal software release notes](#).

Upload Targets Quick Start:

1. Select a collection and enter a new search target OR upload an existing list of targets.
2. Use the filters and analysis tools to find the exact data for which you're looking.
3. Add files to the download basket to control your download options.

See the [User's Guide](#) for more detailed documentation and [video tutorials](#).

Currently available data collections:

- MAST Observations: Millions of observations from JWST, Hubble, Kepler, GALEX, IUE, FUSE, and more.
- Virtual Observatory: Search thousands of astronomical data archives from around the world for images, spectra, and catalogs.
- Hubble Source Catalog: A master catalog with a hundred million measurements of objects in Hubble images.
- MAST Catalogs: Access to catalog data such as Gaia and TESS Input Catalog, with more coming soon.

Featured tutorial: Using Auth.MAST, MAST's authorization token system.

See all video tutorials on the [MAST YouTube channel](#).

TESScut FFI cutouts & sector information from MAST

Create cutout based on **Object** Moving Target

Make a cutout of a TESS FFI time series for a region of the sky.
You can download the entire set of FFI files from the [TESS FFI Download Scripts](#) Homepage. [Learn more](#) about manipulating these files.
If you use TESSCut for your work, please cite [Brasseur et al. 2019](#)

Position Supply the central coordinates or Target name.

Coordinates **Target name** RA DEC Check for Observations

Cutout Size Choose how large the final cutout image will be. A 20x20 pixel cutout is roughly 10Mb per sector.

X (CCD column) Y (CCD row) Units Maximum cutout area is 10,000 pixels
(1 TESS pixel = ~ 21 arc seconds)

Product Select the product type of the cutouts (SPOC or TICA).
Product If SPOC product is not yet available, select TICA:
A quick-look alternative while SPOC products are being processed.

Sectors Select the sector wanted for cutout.
Sector Refresh Sectors Click refresh for the option to choose a sector.
Otherwise, all sectors will be selected.

TESS Bulk Downloads

MAST offers programmatic access to many of the TESS data products. There is an [API](#) and an [astroquery](#) package that offers access to TESS data products within the Portal. You can automatically download files, given their MAST URL, using [wget](#) or [cURL](#). For a summary of ways to search and download data, see [this Archive Manual page](#).

On this page, you can find download options for several different TESS products. Some products are available to directly download via links, such as the engineering files. Others are provided via curl scripts to sequentially download a large number of files, such as getting all the FFI files from a given sector, or all light curve files for a given Guest Investigator program.

Jump to:

- [Pixel Products \(LC, TP, DV, FFI, CBV, COL\)](#)
- [Catalogs \(TIC, TOI, TCE\)](#)
- [Engineering and Model Files](#)
- [Simulated Data \(ETE-6, Lilith-4\)](#)

Pixel Products

Bulk Download Of FFIs, Target Pixel, Light Curve, and DV Files By Sector

Visit the [FFI-TP-LC-DV Bulk Downloads Page](#) to get cURL scripts to download all the full frame images, target pixel, light curve, or data validation files for a given Sector.

Target Pixel, Light Curve, and Data Validation Files By Guest Investigator Program

Visit the [Guest Investigator Bulk Downloads Page](#) to get cURL scripts to download all light curves, target pixel files, and data validation files for a given Guest Investigator Proposal ID.

Download Co-trending Basis Vectors By Sector

Visit the [CBV Downloads Page](#) to download the co-trending basis vector FITS files for a given Sector+Camera+CCD.

Download Collateral Target Pixel Files By Sector

Visit the [Collateral Target Pixel File Downloads Page](#) to download the collateral target pixel FITS files for a given Sector.

AWS Cloud-Hosted Copy Of Data

Calibrated and uncalibrated full frame images, two-minute cadence target pixel and light curve files, and co-trending basis vectors, and FFI cubes are available on Amazon S3. Read more about how to access this dataset at:

- MAST Labs: <https://mast-labs.stsci.io/2018/12/tess-data-available-on-aws>
- AWS Registry: <http://registry.opendata.aws/tess/>

Catalogs

Download TCE and TOI Catalogs In CSV Format

Visit the [TCE Bulk Downloads Page](#) to get .csv text files of all the Threshold Crossing Event (TCE) statistics from a given sector or sector range ("multi-sector").

Download TIC and CTL Catalogs In CSV Format

Visit the [TIC and CTL download page](#) to get the full catalogs as .csv files.

MAST TESS Homepage:
<https://archive.stsci.edu/tess>

The screenshot shows the MAST TESS homepage. It features a "TESS 2-YEAR SKY COVERAGE MAP" with a color-coded legend indicating the time between target pixel files (TPFs) for different sectors. The legend includes values such as 27 days, 54 days, 81 days, 108 days, 188 days, and 351 days. Below the map is a "Wavelength Coverage" section showing a spectrum from X Ray to Infrared, with specific wavelengths like 6000 Å and 10,000 Å marked.

MAST Discovery Portal
for individual target/
cross-mission search:
<https://mast.stsci.edu>

The screenshot shows the MAST Discovery Portal. It displays a "Service Outage Tuesday On To" message and a "JWST and HST Pro" section. The main content area includes sections for "What's New", "Data Retrieval Notes", and "Release Notes". A "Upload Targets Quick Start" guide is also present. On the right side, there is a "Using Auth.MAST Tokens" section with a screenshot of a software interface and a "Watch on YouTube" button.

Bulk Downloads TESS page:
[https://archive.stsci.edu/tess/
bulk_downloads.html](https://archive.stsci.edu/tess/bulk_downloads.html)

The screenshot shows the "TESS Bulk Downloads" page. It provides links for "Pixel Products", "Catalogs", "Engineering and Model Files", and "Simulated Data". There is also a link to the "FFI-TP-LC-DV Bulk Downloads Page". At the bottom, there are links for "TCE Bulk Downloads Page" and "Download TIC and CTL Catalogs in CSV Format".

TESScut for FFI cutouts
of particular sectors/objects:
<https://mast.stsci.edu/tesscut>

The screenshot shows the "TESScut" page. It has a "Create cutout based on" dropdown menu with options for "Object" and "Moving Target". Below this is a "Position" section for specifying central coordinates (RA, DEC) and a "Cutout Size" section for choosing the final image size. A "Jump into API" button is located at the bottom right.
